Learn to Make a Difference

TOID 21707

The *Certificate IV in Operating Theatre Technical Support (HLT47515)* has been developed with the sole focus of professionalising the theatre technician role within the hospital environment and health care industry. Your employee will learn to build advanced leadership and mentoring skills to set a positive example within the workplace and be able to effectively manage a theatre technician team.

COMMENCEMENT DATES: 3rd September

DURATION: 14 Sessions over 8 months

LOCATION: Collingwood Campus

COURSE FEES: *This course may be funded by the state and Commonwealth Government. Accessing funding may impact your future access to funding. To see a full breakdown of course fees, visit our website.*

Government Funded: \$2,000.00 tuition fee + \$190.00 material fee

Not Government Funded: \$5,000.00 tuition fee + \$190.00 material fee

The *Certificate IV in Operating Theatre Technical Support (HLT47515)* is designed to be undertaken by staff members looking to upskill their leadership and mentoring skills. This course will support staff to unlock emotionally intelligent leadership skills and understand the power of reflective practice and conversations within the workplace.

At different points throughout the program, there are activities that are designed to test the leadership skills and industry awareness of each student. The theme of the course is centered around personal mastery, which will help our graduates bring real value to the workplace and to develop strong problem solving skills to - get it done!

**IT'S MORE THAN JUST
A COURSE, IT'S A WAY
OF LIFE.**

Send your employee to attend our next information session to discover their options. For more information visit our website or call 1300 764 651.

ENSURE YOUR EMPLOYEES' SUCCESS

To ensure your employees' success throughout the course we need a commitment from you. There are 3 major projects which are developed and will be implemented within the workplace, with on-site visits from our trainers for assessment of workplace projects.

PROJECT 1: MENTORING PROGRAM

The first project will involve developing a performance plan for the mentor and a learning plan for the mentee.

They will be required to provide mentoring support to 2 people in the workplace and facilitate a minimum of 3 structured meetings.

These mentee's can either be a new staff member or student undertaking practical placement.

PROJECT 2: INFECTION CONTROL PRACTICES

Involves being responsible for leading the development and implementation of a WHS audit and risk assessment of one work area in relation to infection control practices.

Required to identify 1 opportunity for improvement and an improvement plan developed in relation to this.

This improvement plan must be developed in collaboration with team members.

PROJECT 3: PROFESSIONALISING THE OTT ROLE

They will be required to take on a leadership role in generating conversation and debate about professionalising the OTT role and what a professional OTT practitioner means in terms of skills, knowledge and attitude.

A key part of this project is the development of an OTT practitioner code of ethics and code of conduct.

One key emerging trend in the OTT fraternity is efforts to professionalise the OTT role in health care settings.

PROBLEM SOLVING SKILLS IN THE WORKPLACE

At Education Institute we believe in a practical, hands-on approach to our training. Graduates from this qualification will be prepared to begin their journey as a leader and mentor within an operating theatre environment. We aim to train your staff in a holistic approach so they perform at a higher level in relation to:

- Advanced leadership and management skills
- Conflict resolution skills
- Strong mentoring practices for staff and students
- Promotion of cultural diversity in the workplace
- Infection control practices
- Communication and relationship building
- Liaising with sales reps
- Maintenance of machines
- Emotional intelligence
- Reflective practices
- Strong philosophical understanding of what it means to be a professional
- Versatility in the workplace
- Ability to be self-sufficient and proactive
